

NORTHBRIDGE INSTITUTE OF TECHNOLOGY

NB-IN-04 • Internship and Experiential Learning Policy

Document Control	Details
Policy Code	NB-IN-04
Effective From	01 August 2026
Approved By	Office of Experiential Learning
Status	Current

1. Purpose

This policy governs academic approval, participation, monitoring and assessment of internships and approved experiential learning activities.

2. Eligibility

Students must satisfy programme-specific eligibility requirements stated in the internship notice. A student on academic probation may require additional approval for an internship for academic credit.

3. Approval Before Commencement

An internship must be approved by the department before commencement if the student seeks academic recognition or attendance consideration. Approval shall identify the host, dates, mode, academic relevance and supervising faculty member.

4. Attendance Consideration

A formally approved internship may receive attendance consideration for the approved period in accordance with the Attendance and Leave Policy. Consideration is limited to approved dates and applicable courses.

Attendance consideration does not waive assessment, examination or other academic requirements unless separately approved.

5. Internship Assessment

Academic recognition may be based on host evaluation, student report, presentation and faculty assessment as specified by the programme.

Required documentation must be submitted within the deadline communicated by the Office of Experiential Learning.

6. Unapproved Internships

An internship without required prior approval does not automatically qualify for attendance consideration or academic credit.
